

## Information Technology (IT) Committee ~ Dr. HO Chung Ping, MH

On 13 May 2009, the Taoyuan project reached an important milestone. The HKMA CMS 3.0 software successfully passed user acceptance test (UAT) and the System Test. To make sure the system was reliable, the HKMA team carried out a very vigorous test on the system, bugs were identified, corrected and subjected to re-test again. Dr. David WONG and Dr. Golden WONG spent many sleepless nights doing the job. The project developer, the Mobigator Technology Group, was also under high work pressure. They needed to put up a revised version nearly once per day! The atmosphere was a festive one when we signed the acceptance tests.

After the UAT, the pilot test began. We have 20 doctors who volunteered to join the test. The testing phase began on 1 June for a period of 8 weeks. For the pilot testers, the project team will provide onsite installation of the software for the doctors, and there will also be free technical support.

The Briefing session for CMS 3.0 Pilot Testers was held on 30 May, with most of the pilot testers attended. Mobigator gave an overview of the system followed by a detailed demonstration of the whole system, and the logistics of the Pilot Test was presented as well. In addition, Mobigator would provide onsite installation of software to all the pilot testers, and they would begin the 2-month pilot test as soon as the installation finished. During the pilot testing period, registrants could login to <http://cms3.mobigator.com/bugg> to record and report the bugs issues they encounter, and provide feedback and suggestions for improvement.

A tea gathering will be arranged for all pilot testers on 4 July afternoon at Central Premises, to share the experience or difficulties members encounter during the pilot testing period. The software would be ready for the official launch in late August to early September.

To facilitate doctors using the CMS, we shall form a TYP Club after the pilot test. All members of the HKMA are welcomed to join. 'Club members' will be given the software CD for free and enjoy a discount on the hardware and software maintenance. There will also be a briefing session for the 'club members'.

The "Certificate Course on IT Usage in Medical Practices 2009" will begin on 15 June. The course was over-subscribed. Priority will be given to those who take part in the pilot tests and the user group.
