

## TaoYuan Project Report — Project Management Consultant Appointed ~ Dr. HO Chung Ping, Chairman, Information Technology Committee

After much discussion and negotiation, the TaoYuan Project Steering Committee has finally signed the contract with the Project Management Consultant on 15 August 2007. To facilitate the Project Management Consultant, the contract was signed and witnessed in Dr C P Ho's office.

The contract was awarded to Mr Jefferson Wat 屈國良 of the Asia Solutions. He is a 30-year veteran with experience in large scale information technology, especially software development & consultation. He had worked for IBM, Renful Chinese Computer, Jardine Logica, Unisys (Sperry). He later founded the Asia Solution in which he is the director. Jefferson has established various mobile computing platforms to enhance the traditional POS, retail & distribution, warehousing & logistics, and even manufacturing solutions. Jefferson has also started the Professional Service Division to promote the essence of software quality & the state-of-the-art software development processes. He also helped Automated Systems to get a successful CMMI Level 3 appraisal (a world class quality standard based on software development).

The job of the Consultant is to design the 'user requirements' and specifications of the Clinical Management Software. He would need to interview doctors and IT personnel in various fields, e.g., the private laboratories, the Hospital Authority and the Department of Health etc. This was to ensure that the future program would meet the needs of the doctors and yet there can be data exchange between the private and the public health providers. Basing on his recommendations, we would then start the actual programming job.

We would need your input on how you would like YOUR future software to be. Some colleagues mentioned the use of bar codes and some recommended the use of a digitizer for data input without the use of the keyboards. Some colleagues would like direct downloading data from private laboratories. Although we may not be able to entertain all these requirements, we would try to accommodate them as far as possible. If you like to help us in anyway, you can contact our secretariat at 2527 8285 or send me an email direct at [cpho@hkma.org](mailto:cpho@hkma.org)

## General Practitioners

**DOCTORS WANTED**  
[www.tyhealthcare.com/career.htm](http://www.tyhealthcare.com/career.htm)

### Income
